REPOSE FURNITURE LAUNCHES THE BOSTON PORTER

0

BY SUPPLIER ON JUNE 20, 2018

PRODUCT ARTICLES

The Boston Porter is the latest addition to our comprehensive healthcare seating range. It features our new wing handles for ease of portering when the chair is occupied and the backrest is reclined and also our new double comfort lateral back cushion for luxurious support and comfort. With a choice of either an electric or manual model it comes with standard features that include Tilt in Space, independent backrest recline and leg elevation, as well height and angle adjustable footplate all aimed at maximising postural management. It is ideally suited to being part of a client's 24-hour pressure care management programme.

A range of interchangeable pressure management back and seat cushion options ensure that the correct comfort and posture choices can be made.

Kate Sheehan, Repose's resident OT commented "The Boston has been engineered to meet the needs of semi-ambulant and non-ambulant users with a range of additional support features to modify the chair to individual needs"

For more information on the full range of seating solutions available call 0844 7766001, email info@reposefurniture.co.uk or visit www.reposefurniture.co.uk
