

Harlem Porter

The Harlem Porter designed to deliver exceptional comfort and safety for all types of conditions.

Harlem Porter

Every aspect of the Harlem Porter has been engineered to provide a comforting feeling of safety and security, from the high arm design to the wheeled footplate, to the robust construction; each element of the design is tailored to support conditions associated with severe or involuntary movement.

Key features at a glance:

- Independent backrest recline
- Seat angle adjustment
- Sliding footplate with a central castor for maximum stability
- Deep padded seat area with a choice of specialist seat cushions
- Seat depth adjustment
- Choice of six interchangeable back cushions styles
- Choice of four removable pressure management seat cushions
- Wide range of specialist headrests
- Optional leg block
- Fabric range selected for health environments
- Four heavy duty lockable castors
- D-rings fitted as standard

Three sizes: small, medium and large.
See the website for more details.

“The care home trials of the Harlem Porter clearly show that this chair offers real versatility and essential support for people with Huntington’s”

Kate Sheehan
Independent Occupational Therapist
