

# Madison

A Dual motor Tilt in Space riser porter, with interchangeable pressure management seat and back cushions.

# Madison

The Madison, with dual tilt in space mechanism and rise function aims to encourage and support independence, but allow for ease of carer management.

The mechanism with a full range of reclined positions, as well as independent back recline and rise positions provides a wide range of positional options to support comfort and pressure management.

## Key features at a glance:

- Choice of interchangeable back cushions
- Choice of interchangeable pressure management seat cushions
- Dual Motor Tilt in Space rise and recline mechanism
- Seat depth adjustment with 1" and 2" adjuster pads
- Heavy-duty push handle with rubber grips and a hook for the handset
- Seat and leg rest generously padded with memory foam and with a removable cover
- Simple to use handset with loop on arm
- Four heavy duty lockable castors
- Available in a wide range of fabrics.

## Additional options:

- Sliding footplate
- Full length arm covers and replacement chaise cover and memory foam
- Range of headrests
- Accupak rechargeable battery system for mains free operation.

*“This chair is ideal for supporting those users who require encouragement to achieve a level of independence and mobility, whilst providing the adaptability to take account of changing conditions.”*
