

# Melrose

A Porter chair with a unique combination of Tilt in Space, independently controlled back recline and leg elevation.

# Melrose

The Melrose has been specifically engineered to meet the comfort needs of individuals with pressure management issues, providing adaptable support for those with neurological and postural conditions.

With a unique combination, of tilt in space and independently controlled back recline and leg elevation, carers can constantly adjust the user's position to relieve pressure and provide all-day comfort.

## Key features at a glance:

- Tilt in Space back rest recline
- Independent back rest recline
- Independent leg rest adjustment
- Choice of interchangeable back cushions
- Choice of interchangeable pressure management seat cushions
