

# Multi Bari

A Bariatric rise recliner chair with interchangeable pressure management seat cushions for users up to 40 stone.

# Multi Bari

Our extremely comfortable bariatric chair, the Multi-Bari, offers the highest standard of pressure support with specialist seat cushions, generous fibre-filled back cushions for posture support and memory foam padded seat and leg rests enabling complete bariatric posture positioning.

The Dual Motor mechanism with rise function has a 254kg (40 stone) weight limit and 160kg (25 stone) leg rest capacity which offers maximum user support.

## Key features at a glance:

- Standard Dual Motor rise and recline mechanism
- Waterfall back cushion with blockers for additional lumbar support
- Choice of interchangeable pressure management seat cushions
- Seat depth and width made to measure
- Flat wide arms for deep comfort and support
- Seat and leg rest generously padded with memory foam and with a removable cover
- Loop for handset control and deep side pocket
- Heavy duty glides are built in as standard
- Available in a wide range of fabrics.

## Additional options:

- Full length arm covers and replacement chaise cover and memory foam
- Head and seat covers
- Additional safety features
- Range of headrests.

*“Designed to support users of up to 40 stone, we have tailored the back for optimum posture support and built the seats for interchangeable pressure management. This chair will support people with edematous legs due to the leg rest capacity of 25 stone.”*
