

Stamford

Tilt in Space recliner chair with three effortless movements - ideal for a ward environment.

Stamford

The Stamford is one of our healthcare chairs, designed for everyday comfort with a contoured support back and a choice of electric or manual tilt in space mechanisms. Ideal for general use next to a bed or in the lounge of a care home or hospital.

Key features at a glance:

- Choice of an electric Single Motor Tilt in Space mechanism with or without rise function
- Choice of a manual Single Tilt in Space
- Seat cushion is fixed as standard
- Choose one of our pressure management seat cushion options fixed as standard
- Contoured back
- Four heavy duty lockable castors
- Available in a wide range of fabrics.

Additional options:

- Range of headrests
- Accupak rechargeable battery system for mains free operation.

“Designed for comfort this multi-purpose chair with its single motor tilt in space is ideal for any healthcare environment. This chair has limited seams and simple lines to assist with infection control processes.”
