

Oregon

Patient transfer recliner chair

This chair has been specially designed with swing away arm systems to both sides, this allows the carer patient access by the side of the chair and for the cleaning of any spillages. With limited seams in the design of this chair, it assists with infection control and patient care, without jeopardising the comfort of the patient. This chair has large lockable castors allowing the chair and the patient to be transferred to multiple locations.

Suitable for:

- General ward use
- Day care

Fabric in image: Manila Ore outside panels
Valencia Skylight inner
